SUMMARY

Full-stack developer who builds and runs production software for real businesses. As a freelancer I have designed, built and deployed 10+ web and mobile applications, from a restaurant operations platform handling ~500 orders per month to multi-tenant SaaS, payment platforms and fleet telemetry. In my day job as an ERP consultant I build data integrations between enterprise systems. I own the full cycle: requirements with the client, data modelling, backend, frontend, mobile, testing, Docker deployment and support.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS
Frontend: React, Next.js (App Router), Tailwind CSS, shadcn/ui, Framer Motion, PWA, Leaflet / Mapbox
Backend: Node.js, REST APIs, PostgreSQL, Prisma, Drizzle ORM, Redis, BullMQ, NextAuth, JWT, RBAC, multi-tenancy
Mobile: Capacitor (iOS/Android), React Native / Expo
Integrations: Stripe / Stripe Connect, Redsys, Holded API, SOAP web services, Google APIs (Ads, Business Profile, Search Console, GA4), WhatsApp, web push, OpenAI and Anthropic APIs, MCP
Cloud, DevOps & Testing: AWS, Docker, Docker Compose, Linux VPS, Cloudflare Tunnel, Git / GitHub, Turborepo, Vitest, Playwright

EXPERIENCE

Freelance Full-Stack Developer 2024 – Present

Self-employed · Remote / Lleida, Spain

I design, build, deploy and maintain production applications for small and mid-sized businesses. All projects below are live with real users.

- Vialika (vialika.com) – restaurant operations platform** (client: Forno & Tango, ~500 orders/month). End-to-end system covering online ordering, kitchen display, delivery dispatch, inventory and warehouse, staff time tracking and driver settlement, customer CRM, Google reviews and Holded accounting sync. 800+ commits.
 - Native driver app (Capacitor), published on the App Store and Google Play via private distribution, with background GPS tracking, push notifications and turn-by-turn Mapbox navigation.
 - Replaced a paid third-party tool (QZ Tray) with a custom print agent that drives every kitchen printer at a location, with no browser, Java or licence needed.
 - Staff clock-in with GPS geofencing and rotating QR codes; permission-based access control; in-app AI assistant with a permission-scoped SQL tool.
 - Unit, API smoke and Playwright end-to-end tests; containerised deployment with Docker.Next.js, TypeScript, PostgreSQL, Prisma, Capacitor, Docker, Playwright
- Gremial (gremial.es) – multi-tenant SaaS for employee time tracking** (Spanish labour-law compliance). In production with an 8-employee mechanic workshop; a 100+ employee company is in final contract stage. Turborepo monorepo with a REST API, company web panel, internal admin and public website, plus two React Native (Expo) apps published on the App Store and Google Play: an employee app (GPS geofence and QR clock-in, offline storage, push notifications) and a shared in-store clock-in app. Strict tenant isolation, role-based permissions, GDPR-compliant handling of GPS and photos, Stripe billing, and a tamper-proof audit trail where every edit is preserved.
TypeScript, Node.js, Next.js, Expo, PostgreSQL, Prisma, Stripe, Vitest, Playwright, Docker
- QuickVoucher (quickvoucher.app) – multi-tenant event ticketing platform.** Handling ticket sales for a 2,000-attendee event in November 2026. Payments and organiser payouts with Stripe Connect (separate charges and transfers, batched payouts), background jobs with BullMQ/Redis, and an offline-capable PWA for scanning QR tickets at the door.
Next.js, TypeScript, PostgreSQL, Prisma, Redis, BullMQ, Stripe Connect, Vite PWA
- Luxxo – fleet management for an electric ride-hailing fleet in Barcelona.** 24/7 telemetry daemon over a SOAP vehicle-tracking API, reconciliation of Uber, Cabify and Bolt payouts, invoicing, PDF/CSV reporting and live map views.
Next.js, TypeScript, PostgreSQL, Prisma, SOAP, Leaflet, PDFKit, Docker

- **Google Ads MCP server.** Python MCP server that lets Claude audit and manage a local business's Google Ads, Business Profile, Search Console and GA4, with every change validated by Google and confirmed before it is applied.
- **Other client work:** e-commerce store with Redsys card payments and admin panel; law-firm website with online booking, invoicing and PDF generation; women's football club website and installable management app; mobile-first bar accounting app. Personal project: personal-finance app with bank sync and AI insights.

ERP Consultant Oct 2024 – Present

CSB-System Spain · Lleida, Spain

- Implement CSB-System ERP for B2B food-manufacturing and logistics clients, covering the production, quality-assurance and cutting/deboning modules.
- Build integration interfaces that import and export data through flat files and web services, connecting the ERP with clients' external systems.
- Work directly with client teams to turn business processes into system configuration and support them through go-live.

Web Developer Sep 2022 – Jun 2023

eCityclit · Lleida, Spain

- Joined as an intern and was hired part-time. Designed and developed websites on Plone 4, 5 and 6, handled frontend work and content management, and wrote technical documentation.

Web Developer & IT Support (internship) Jun 2022 – Aug 2022

Comcubed Computers · Derry, Northern Ireland, UK

- Designed and built the company website; diagnosed and repaired hardware and software issues.

Additional experience 2021 – 2025

Customer-facing and operations roles in Spain and the US (J-1 summer work programmes in Denver and Austin), alongside my studies and tech work: delivery and shift management at a pizzeria, plus hospitality roles in fast-paced, English-speaking teams.

EDUCATION

Higher Vocational Diploma in Web Application Development (DAW) – Ilerna, 2021 – 2023

Vocational Diploma in Microcomputer Systems and Networks (SMR) – Ilerna, 2019 – 2021

LANGUAGES

English (fluent; lived and worked in the UK and the US) · Spanish (native) · Catalan (native)
